JUSTIFICATION: Maxim has successfully completed qualification for transfer of final test for the MAX24101 from Maxim's Thailand facility to external test partner Sigurd. This transfer improves manufacturing flexibility and capacity expansion and will help reduce test cycle time. Devices sold in trays will also have a tray change resulting in a different pin 1 orientation. There is no change in orientation for devices supplied in Tape and reel.

TRACEABILITY: Maxim Integrated maintains full traceability by device marking and the packaging labels or shipment packing slip.

Maxim Integrated's Change Notification System is designed to keep our customer base apprised of major product, manufacturing, or facility improvements.
